DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-22, drawn to an abrasive tool for removing material from a workpiece, classified in class 451, subclass 259.
- II. Claims 23-28, drawn to a method of manufacturing an abrasive tool, classified in class 451, subclass 541.
- III. Claims 29-34, drawn to a method of removing material from an elongate non-metallic workpiece, classified in class 451, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the tool can be formed by molding and then applying an abrasive to the molded tool.

Inventions I and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or

Art Unit: 3723

(2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the tool can be used to perform a removal operation on a metallic workpiece.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Invention II is making a tool, and invention III is removing material from a non-metallic workpiece.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
